

AHMED MELAIH

Senior Systems Analyst — (Data & Analytics) | Performance Management & Analytics

Manama, Bahrain • +973 3979 6847 • ahmedelaih@gmail.com • LinkedIn • ahmedelaih.github.io

PROFESSIONAL SUMMARY

Senior Systems Analyst — (Data & Analytics) with 9+ years of experience designing and implementing performance dashboards, KPI frameworks, and balanced scorecards for enterprise clients in banking and financial services. Proven ability to gather, consolidate, and analyze operational and financial performance data from multiple business units, translating complex datasets into actionable insights for senior leadership and C-level stakeholders. Skilled in aligning performance metrics across strategic business units (SBUs) with corporate objectives, developing project controls practices, and driving accountability through proactive monitoring mechanisms. Currently pursuing Master of Science (MSc) Big Data Science & Analytics; holds Bachelor of Science (BSc) Computer Science.

CORE COMPETENCIES

- Performance Management Frameworks
- Corporate Scorecard Design
- Operational & Financial Performance Analysis
- Strategic Business Unit (SBU) Alignment
- Cross-functional Stakeholder Collaboration
- Power BI • Tableau • Data Visualization Platforms
- Periodic Performance Reviews & Reporting
- KPI Development & Balanced Scorecards
- Performance Dashboards & Data Visualization
- Project Controls & Performance Measurement
- Benchmarking & Performance Objectives
- Senior Leadership & C-Level Reporting
- Python • SQL • Advanced Analytics
- Capital Portfolio Monitoring & Tracking

PROFESSIONAL EXPERIENCE

Senior Systems Analyst — Data & Analytics | Gulf Business Machines (GBM), Bahrain

Jul 2020 – Present

- Designed and implemented performance dashboards and KPI frameworks for 15+ enterprise clients using Power BI and Tableau, ensuring KPIs and balanced scorecards were effectively communicated to senior leadership and C-level stakeholders.
- Gathered and consolidated performance data across multiple Strategic Business Units (SBUs), standardizing performance metrics to ensure data was consistent, timely, and aligned with corporate objectives — directly supporting corporate scorecard delivery.
- Analyzed operational and financial performance data to identify areas for improvement and provided actionable insights to senior management, contributing to periodic performance reviews and data-driven decision-making.
- Supported the development of performance objectives, KPIs, and benchmarks in collaboration with business units to ensure alignment with the group's strategic goals.
- Collaborated with project managers and business units to ensure consistent tracking and reporting of performance across enterprise projects and programs; generated detailed data visualizations for executive reporting.
- Governed performance measurement standards and data quality controls across multi-vendor environments, enforcing accountability and compliance with IEC 62443 and audit requirements.

ERP Systems Analyst | Almoayyed Computers, Bahrain

Jan 2020 – Jun 2020

- Extracted, cleansed, and consolidated ERP performance data across business unit teams; generated performance reports and reconciliation analyses that improved data accuracy and on-time reporting aligned with operational objectives.

IT Engineer — Voice & Data | GWC Ltd., Bahrain

Jun 2017 – Dec 2019

- Managed 20+ data and network integration projects applying project controls practices — including SLA tracking, performance metrics monitoring, and structured performance reporting — ensuring on-time, accountable delivery with documented acceptance gates and corrective actions.

IT Production Support — Dealing Room | BNP Paribas MEA Regional IT

Jan 2017 – May 2017

- Supported operational performance within a Tier-1 international banking environment; maintained strict SLA compliance, contributed to performance reporting, and applied ITIL change management under regulated audit controls.

KEY PROJECTS

AI-Powered Performance Analytics & Fraud Detection System — Python, Scikit-learn, Power BI

- Designed and developed an end-to-end analytics system with performance dashboards and data visualization reporting to monitor model outcomes and operational KPIs; achieved 91% classification accuracy on imbalanced transaction data leveraging ML and generative-AI tooling.
- Implemented full analytics lifecycle: EDA, data consolidation, feature engineering, model training, performance evaluation (ROC-AUC, precision/recall), and explainability reporting for stakeholder communication.

Enterprise KPI & Performance Reporting Standardization — Power BI, Tableau, Python (GBM client projects)

- Led standardization of KPI reporting and performance dashboards across 15+ enterprise projects, aligning performance metrics with corporate scorecards and enabling senior leadership to make timely, data-driven decisions.

Bapco Energies Group Performance Dashboard — HTML5 · JavaScript · SVG · CSS3

Designed and built a fully interactive Group Performance Dashboard referencing Bapco Energies' corporate scorecard, SBU performance vs. targets, BMP capital portfolio tracking, and HSE KPIs — demonstrating end-to-end performance management and data visualization capability aligned with the role.

Features 4 interactive tabs, animated KPI ring gauges, balanced scorecard, live period selector (Q1–Q4 / YTD), SVG trend charts, and full mobile-responsive design — built with official Bapco Energies branding and real published operational data. **Live Demo:** ahmedmelaih.github.io/bapco-performance-dashboard

EDUCATION

Master of Science (MSc) Big Data Science & Analytics *(In Progress)*

Bachelor of Science (BSc) Computer Science — University of Bahrain | 2016

CERTIFICATIONS

- Data Science & Machine Learning — SkillsUnion / Tamkeen (2025)
- Data Science Career Development Bootcamp — General Assembly BIBF (2026)
- IEC 62443 Industrial Cybersecurity Practitioner

ADDITIONAL SKILLS

Analytical & Performance Management Tools: Power BI • Tableau • Excel (Advanced) • SQL • Python • Jupyter |
Languages: English (Fluent) • Arabic (Native) | ITSM: ServiceNow • ITIL | Standards: ISO 27001 • IEC 62443
